## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see Arguments, filed 4/18/08, with respect to US 4,927,681, US 4,788,097, US 5,206,665, and US 5,188,923 have been fully considered and are persuasive. The rejections of the claims have been withdrawn.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,591,501 in view of US 5,563,872.

The '501 reference discloses a recording medium as described in the previous Office Action. Applicant has amended the claims to specify that the predetermined pattern of cavities comprises a two-dimensional strip of bit positions in each track. It is recognized that the '501 reference specifies that the cavities are aligned in each track. However, the '872 reference shows that it is known to arranged pits in a two-dimensional pattern in each track. This is done to achieve a higher density of recorded material. Therefore, it would have been obvious to one of ordinary skill in the art to arrange the cavities in the '501 reference in a two-dimensional pattern as shown in the '872 reference. One would be motivated by the reasoned expectation of obtaining the high recording density. High density is a feature discussed as desirable in the '501 reference, i.e. adjusting cavity spacing for higher density.

***Allowable Subject Matter***

Claims 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
